

eLearning Player

Meeting your training needs in an efficient and cost effective way

eLearning Player is fundamentally an online education and corporate training software. A user can view all the courses that are on offer. They can get themselves registered and buy single/multiple courses, modules or chapters of a course. They may also get free tutorials in case such material is being provided at the time in question.

The **eLearning Player** offers many opportunities to decrease costs while increasing service and efficiency. It makes use of hi tech development tools and techniques to enable you to derive maximum benefit. eLearning Player serves all industries and seeks to ensure that they reap the maximum benefits from their businesses while making rapid progress.

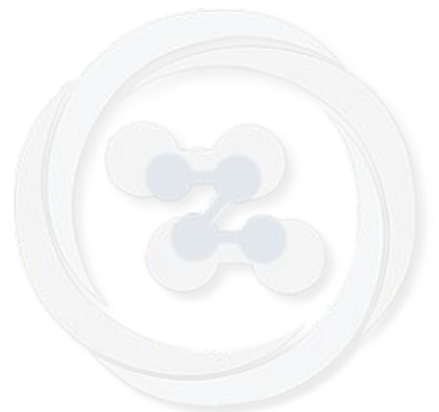

eLearning Player comes with improved navigability and manageability and also administrative control for site content. There is dynamic rebuilding of most of the static and informational pages. As **eLearning Player** is based on built-in content management system (e-CMS) when new pages are added the concerned changes will be automatically reflected in the existing designs.

Highlights

- ☞ Attractive Playback experience
- ☞ No limits on user accessibility
- ☞ Course planning and viewing flexibility
- ☞ Customizable presentation viewer
- ☞ Sales reports
- ☞ Superior courseware

Employ latest training techniques

Reap the maximum benefit at a minimum cost

eLearning Player

▶ **Attractive playback experience**

eLearning Player has innovative playback controls (play, pause, previous and next slide buttons) and volume control which make playing of flash movies a pleasant experience. There is a bookmark button too that helps students to easily come back to the slides which they had marked earlier. Slide elapsed time and total time is also displayed for your convenience.

▶ **No limit on user accessibility**

Any number of users can access the same course at a given time. There is no limit to the number of users who can access a particular course at the same time. None of the users can notice that others are using the same course and that too at the same time as them.

▶ **Course planning and viewing flexibility**

Courses can be presented in any way the administrator wishes. **eLearning Player** supports 'n' level courses that can be subdivided into modules, chapters and slides. The administrator may choose to skip the modules and chapters and upload the slides only i.e. the training materials.

▶ **Customizable presentation viewer**

The **eLearning Player** can be customized by the user. Customization in respect of attributes such as skin color and texture, arrangement of child windows etc. can be easily modified according to the convenience of the user.

▶ **Sales report**

eLearning Player permits the administrator to view the students' report at any time. This gives a list of all the students registered, the details of the students, courses purchased by them and total amount paid etc.

▶ **Superior courseware management**

eLearning Player permits superior courseware management features. There is the provision of subdividing courses into sub chapters, modules, chapters and slides.
